Murat Kurul

UX & Product Designer

mmuratkurul@gmail.com | +44 7393 558168 | linkedin.com/in/murat-kurul | Portfolio: muratkurul.com
Richmond, London, UK · Available to start September 2027

PROFILE

Industrial design graduate from Loughborough (2026), now focused on UX and digital product. I like taking a process with lots of steps and information and making it clear for the person who has to use it every day. I have redesigned and launched a client website in Figma, co-designed the app for a food-safety scanner built around one clear safety verdict, and trained a classifier on sensor data for a posture wearable. Research comes first: interviews, user testing and thematic analysis shape the flows before the screens.

EDUCATION

Loughborough University — **Loughborough, UK**
BA (Hons) Industrial Design — *Oct 2023 – Jun 2026*

- User research dissertation: ran 8 semi-structured interviews with BUCS basketball players and used thematic analysis to explore how the look and feel of footwear affects confidence and identity
- Relevant modules: User Research, Creative Ideation, Prototyping, Sketching & Visualisation, Brand Identity, CMF, 3D CAD

Loughborough University – UAL Foundation — **Loughborough, UK**
Level 3 Diploma in Art and Design Foundation Studies — *Sep 2022 – Jun 2023*

ACS Egham International School — **Egham, UK**
IB Diploma — *2020 – 2022*

WORK EXPERIENCE

Outlier AI — **Remote**
AI Trainer (freelance, part-time) — *Oct 2026 – Present*

- Evaluate and rate AI model responses against detailed quality guidelines to help improve them

Host Staffing, London · *Hospitality Staff (flexible shifts)* — *2026 – Present*

Contex Textile (with sister company Conuk Ltd, London) — **Istanbul, Turkey**
Product Design Development Intern — *Jun 2025 – Jun 2026*

- Redesigned the Conuk Ltd website (conukltd.co.uk) in Figma around one clear “from idea to delivery” story for UK retailers and fashion brands, with a responsive layout and an enquiry flow that goes straight to the founders; now live
- Worked with suppliers and factories on samples and specifications, designing within real cost and deadline constraints
- Designed brand presentations for buyer meetings, keeping one visual identity across Contex and Conuk

Grymsdyke Farm – London Design Festival 2025 — **Buckinghamshire, UK**
Workshop Assistant & Designer — *Jun 2025 – Sep 2025*

- Assisted making workshops and designed festival pieces from reclaimed farm materials, including a timber chair

BMW PGA Championship, Wentworth Club — **Virginia Water, UK**
Hospitality Bar Supervisor — *Sep 2023 & Sep 2024*

- Supervised a VIP hospitality pavilion across two championships, handling sponsor and guest requests under pressure

DIGITAL & DESIGN PROJECTS

muratkurul.com – Personal Portfolio Website — *Live, 2026*

- Designed and built a dark, image-led portfolio with a draggable 3D project carousel and a case-study page per project, built with AI-assisted coding and responsive on mobile

AERØ – Portable Sports Shoe Dryer — *Final year project, 2026*

- Tested early concepts with target athletes before any CAD, then retested and refined the 3D-printed working prototype; built one brand system across logo, packaging, retail display and a community run campaign

FRESHA – Food-Safety Scanner & Companion App — *Group UX project, 2026*

- Co-designed a handheld spoilage scanner and its app in a team of up to four over six weeks: storyboarded the journey (unsure → scan → decide) and designed three app screens, with a Result screen that turns a raw sensor reading into one clear safety score the user can act on

POSTURA – Posture Correction Wearable — *Interactive prototype, 2024*

- Built an Arduino wearable and trained a classifier in Edge Impulse on motion data, so the band learns good and bad posture and gives vibration feedback to correct it

SKILLS

- **UX & research:** User interviews, thematic analysis, user testing, storyboarding, user journeys and flows
- **UI & prototyping:** Figma, Framer, responsive web layout, interactive prototyping (Arduino, Edge Impulse)
- **AI:** AI model evaluation (Outlier) · Claude for coding, prototyping and workflow automation · AI concept imagery
- **Visual & 3D:** Illustrator, Photoshop, InDesign, Procreate · Rhino, SolidWorks, KeyShot
- **Office:** PowerPoint, Excel, Word · **Languages:** English (fluent), Turkish (fluent)

CERTIFICATIONS

Google UX Design: Start the UX Design Process (2026) · LVMH Inside LVMH (2026) · Accenture Digital Skills: User Experience · Great Learning UI/UX Design for Beginners · UMD (edX) Product Design, Prototyping & Testing (2021)

EXTRACURRICULARS

Loughborough University Athletic Union – BUCS Basketball Player — *Oct 2023 – Jun 2025*

Loughborough Students’ Union Action – Head of Action — *Oct 2023 – Jun 2024*

- Planned and led the hall’s volunteering programme, from cooking for people experiencing homelessness to games sessions in care homes, coordinating volunteers with the Students’ Union and local partners

INTERESTS

Basketball and sneaker culture · Daily strength training · Food and new cuisines · Rock climbing and hiking · Building things with AI

PORTFOLIO 26/27

Murat Kurul

Multidisciplinary Designer

PRODUCT · BRAND · APPAREL · DIGITAL

London, United Kingdom
Open to relocate

mmuratkurul@gmail.com
muratkurul.com

About me

I'm a London-based **multidisciplinary designer**, trained in industrial design at Loughborough. I work across product, brand, apparel and digital: a battery-powered shoe dryer, a food-safety scanner and its app, my own clothing label and two live websites. A year in-house at **Contex Textile** in Istanbul showed me how ideas meet suppliers, cost and deadlines. Whatever the medium, I start with the person using it.

HOW I WORK

01
People
Who is it for, and where will they use it?

02
Insight
Research, trends and market into one clear opportunity

03
Story
Narrative, moodboard, colour and material

04
Make
Sketches, CAD, flats, prototypes and screens

05
Handover
Specs, feedback rounds, clear presentation

TOOLS

Illustrator, Photoshop, InDesign, Procreate, Figma, Framer, SolidWorks, Rhino, KeyShot, PowerPoint, Excel

LANGUAGES

English, Turkish (fluent)

LOCATION

London · open to relocate

OFF THE CLOCK

BUCS basketball for two seasons, gym, climbing, hiking, and AI as a daily tool for concepts and workflow

Contents

Product, brand, apparel and digital, from research through to a finished outcome.

01	AERØ	Sport product, brand & go-to-market	04
02	Fresha	Product & app · a food-safety scanner that cuts waste	07
03	Liman	My own label · brand identity, apparel & packaging	10
04	Postura	Wearable tech · a band that learns your posture	20
05	Night Court	Concept capsule · anime-uniform streetball warm-ups	22
06	Anatude	Modular outdoor apparel system	24
07	Consumer Insight	Dissertation · basketball, confidence & identity	26
08	Industry	Contex Textile · sourcing, sampling & presentation	27
09	Digital	Two live websites · muratkurul.com, conukltd.co.uk	28
10	More Work	Jewellery, product & furniture	29

AERO

A portable, battery-powered shoe dryer for athletes, designed to cut moisture and odour wherever they train. I took it from user research to a working prototype and a complete brand, including packaging, retail and a campaign.

Project 01 · Final year
Duration: 10 weeks
Type: Product & brand design

Relevant here: designing for a sport consumer, CMF choices and taking a product all the way to shelf.

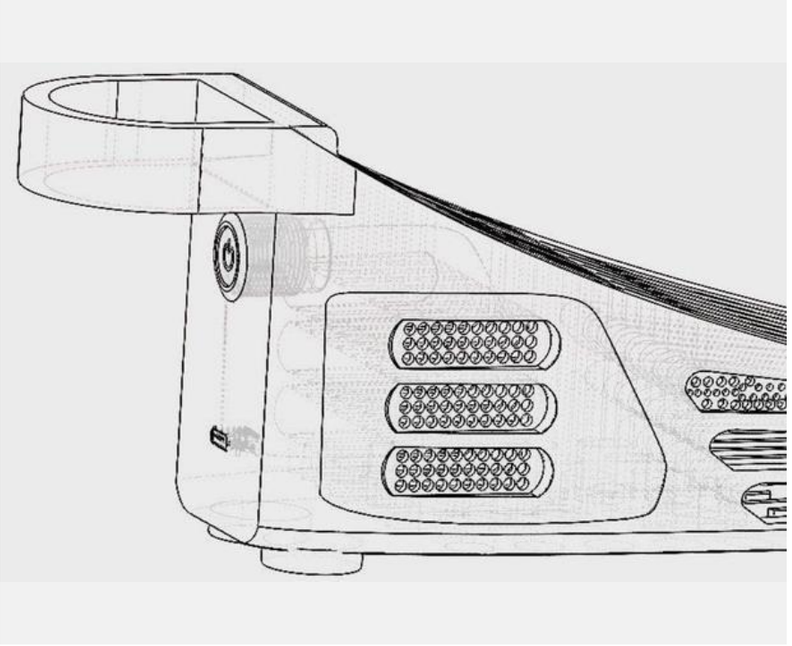

AERØ · BRAND & GO-TO-MARKET

Drying, Redesigned.

Logo, tone of voice, packaging, a sports-retail shelf and a co-branded 10K run + recovery event. The product only works if the athlete meets it in the right place.

Sketch, CAD, print, test, refine

Test early

Early concepts went to target users before any CAD.

Build it properly

External form and internal parts modelled in SolidWorks.

Feedback into the next round

Printed prototype tested again by athletes, then refined.

PROJECT 02 · PRODUCT & APP

Fresha

A handheld scanner that reads spoilage gases and bacteria to show, in seconds, whether food is still safe to eat. A companion app turns every meal saved into CO_2 saved, so cutting waste feels rewarding rather than a chore.

Eat confidently. **Waste less.**

Duration: 6 weeks
Year: 2026
Type: Product & UX design

Relevant here: turning a big problem into a product, an interface and a reason to keep using it.

GROUP PROJECT · TEAM OF UP TO 4

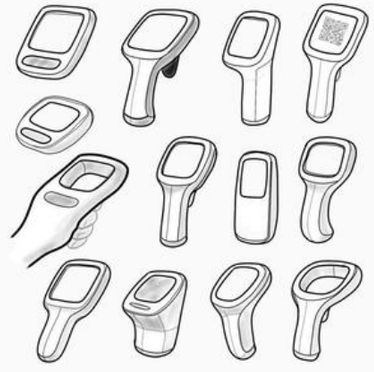

Is it still safe to eat?

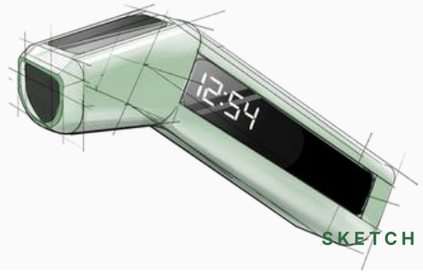

People throw food away because they can't tell whether it has gone off, not because it has. Use-by dates are cautious and the sniff test is guesswork. Fresha swaps the guessing for a clear reading, and shows what binning it would have cost the planet.

⅓
of all food produced globally is lost or wasted

9.5Mt
of food wasted in the UK every year

£14bn
the yearly value of food thrown away by UK households

SKETCH DEVELOPMENT

STORYBOARD

Unsure
Leftovers in the fridge, and the smell test isn't convincing.

Scan
Point Fresha at the food for an instant reading.

Eat
Green means safe. Points for every meal saved.

Sources: FAO (global food loss and waste); WRAP (UK food waste estimates).

Three readings, one app.

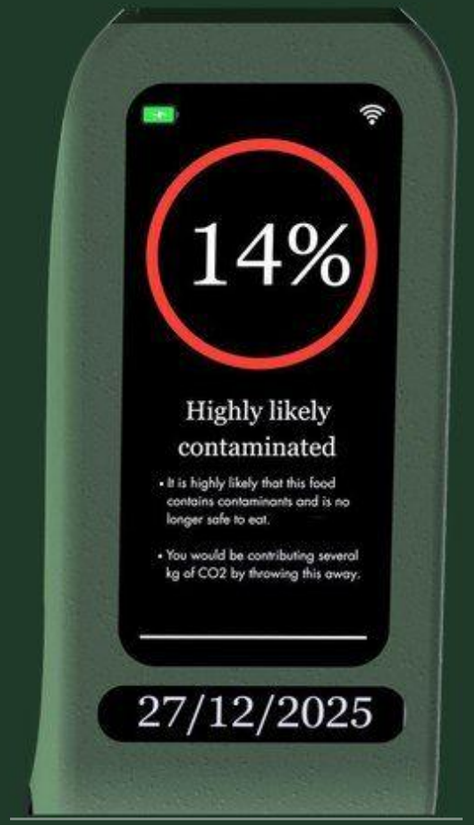

48%

Can't guarantee it. Use your judgement.

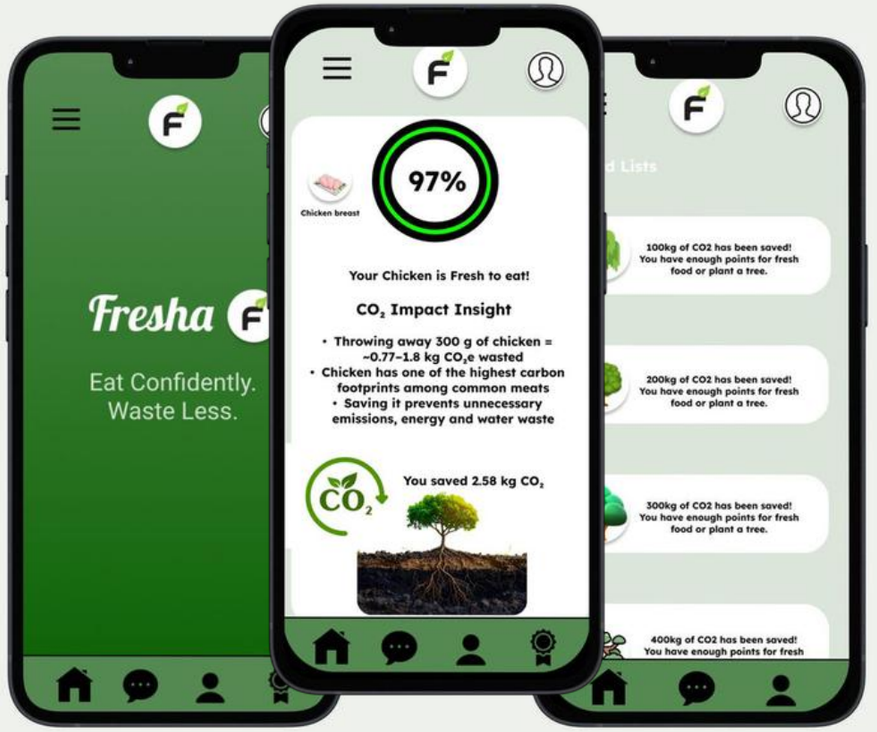

97%

Safe to eat. Points earned.

14%

Highly likely contaminated.

Home
One action: scan.

Result
Score plus that item's CO_2 impact.

Rewards
CO_2 saved unlocks food or a tree.

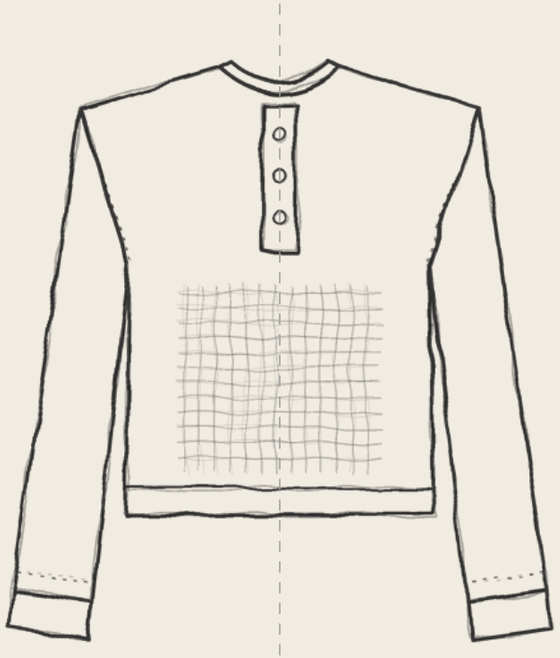

The device screen answers with colour first, numbers second. The app adds the why: what binning it would cost.

Liman

Liman means harbour in Turkish. It's based in İzmir, where I spent my childhood summers on the coast, surrounded by olive trees. The label takes that feeling and turns it into cropped, boxy essentials with sun-faded colour and hand-drawn graphics.

Type: Brand + capsule, self-initiated
Drop: First Summer, 5 pieces
Year: 2026

cropped. boxy. made for long summers.

A brand that feels hand-made

Liman

LIMAN

İZMİR · TÜRKİYE

Script wordmark for product and graphics, loose and quick like a signature. **Olive tree** as the small mark for labels, buttons and social, drawn from the olive groves along the İzmir coast. **Serif lockup** for packaging and anything that needs to feel calm.

COLOUR

Limewash
#F1ECE2 · Whitewashed village walls

Aegean Navy
#1F2B3B · The sea at night, base colour

Terracotta
#B5532E · Roof tiles, hero accent

Olive
#6E6C3E · Olive groves, accent

Sand
#D8C7A6 · Beach and linen, neutral

Awning Blue
#8FAAC4 · Faded beach umbrellas

TYPE & VOICE

Long summers

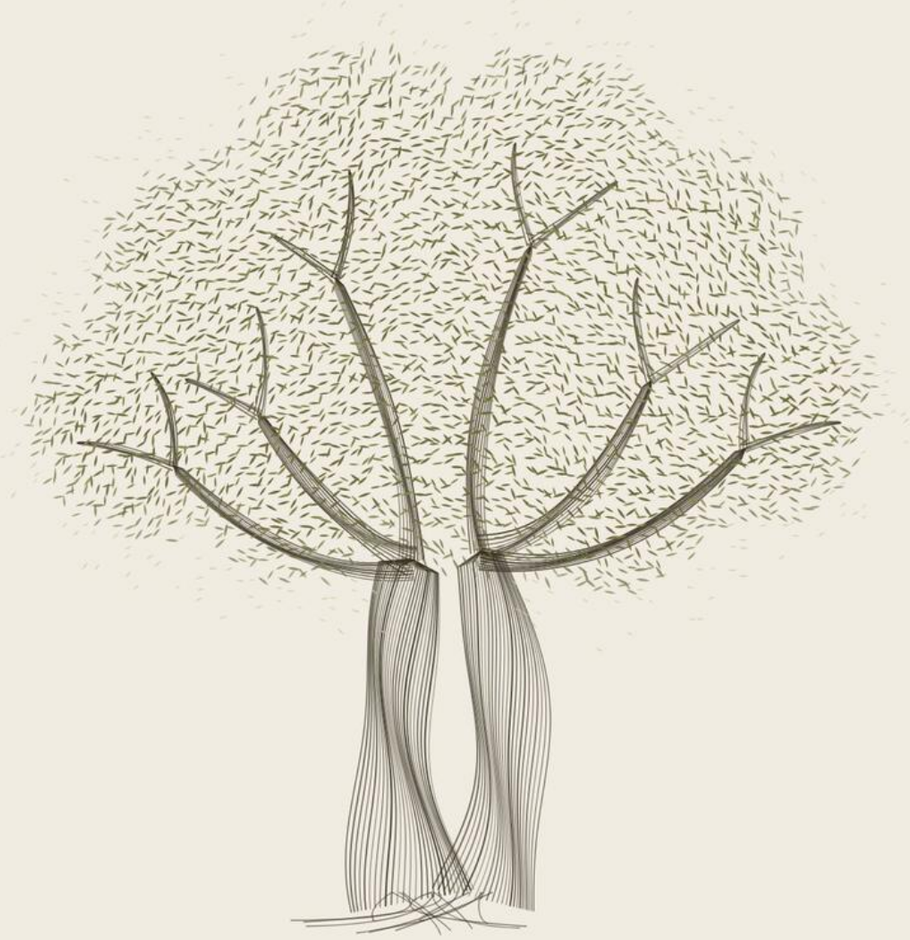

Caveat Brush · graphics

İzmir · Türkiye

Instrument Serif · editorial

Voice: short, warm, a bit dry. Never shouty. "See you at the harbour."

Reference points for attitude, not copied: Stüssy's hand-drawn graphics, Eme Studios and Twojeys, the oversized tailoring of SGO, Aimé Leon Dore's line art and pleated trousers, and Represent's cropped waffle and washed pieces. All marks drawn for Liman.

LIMAN · CAMPAIGN POSTER

One leaf, repeated until it becomes a tree.

The poster is built from a single olive leaf mark, placed thousands of times on a grid and turned by a made-up sea breeze. Where the leaves crowd, the tree appears. The trunk is drawn with fine twisting lines, the way old olive trunks on the Aegean coast look like they've been wrung out.

Text stays tiny and low, like a label sewn into a hem. The same leaf is used on tags, prints and social, so the whole brand speaks one visual language.

LIMAN · CONSUMER

The one who packs light.

20 to 30, lives in a city but plans the year around summer. Five-a-side on Tuesdays, a flight to the Aegean in June, dinners that run late under the olive trees. Wants a small wardrobe that looks considered without trying, and buys fewer, better pieces.

RELAXED · SUN-FADED · HAND-DRAWN · CONSIDERED · SPORTY

THE IDEA

One block, cut shorter and wider, across every top in the range.

01

Cropped hits the belt

Works with high, pleated trousers and wide shorts, the way people wear them now.

02

Boxy means room

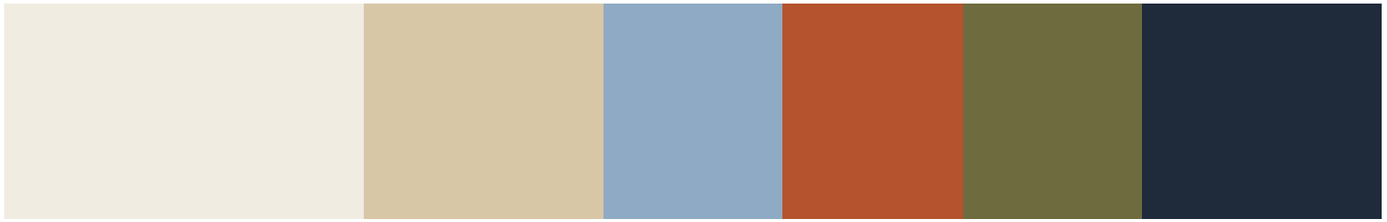

Dropped shoulder and wide elbow sleeves for heat, movement and an easy drape.

03

Sport meets tailoring

A waffle henley from training kit and a stripe shirt from the holiday, cut from the same block.

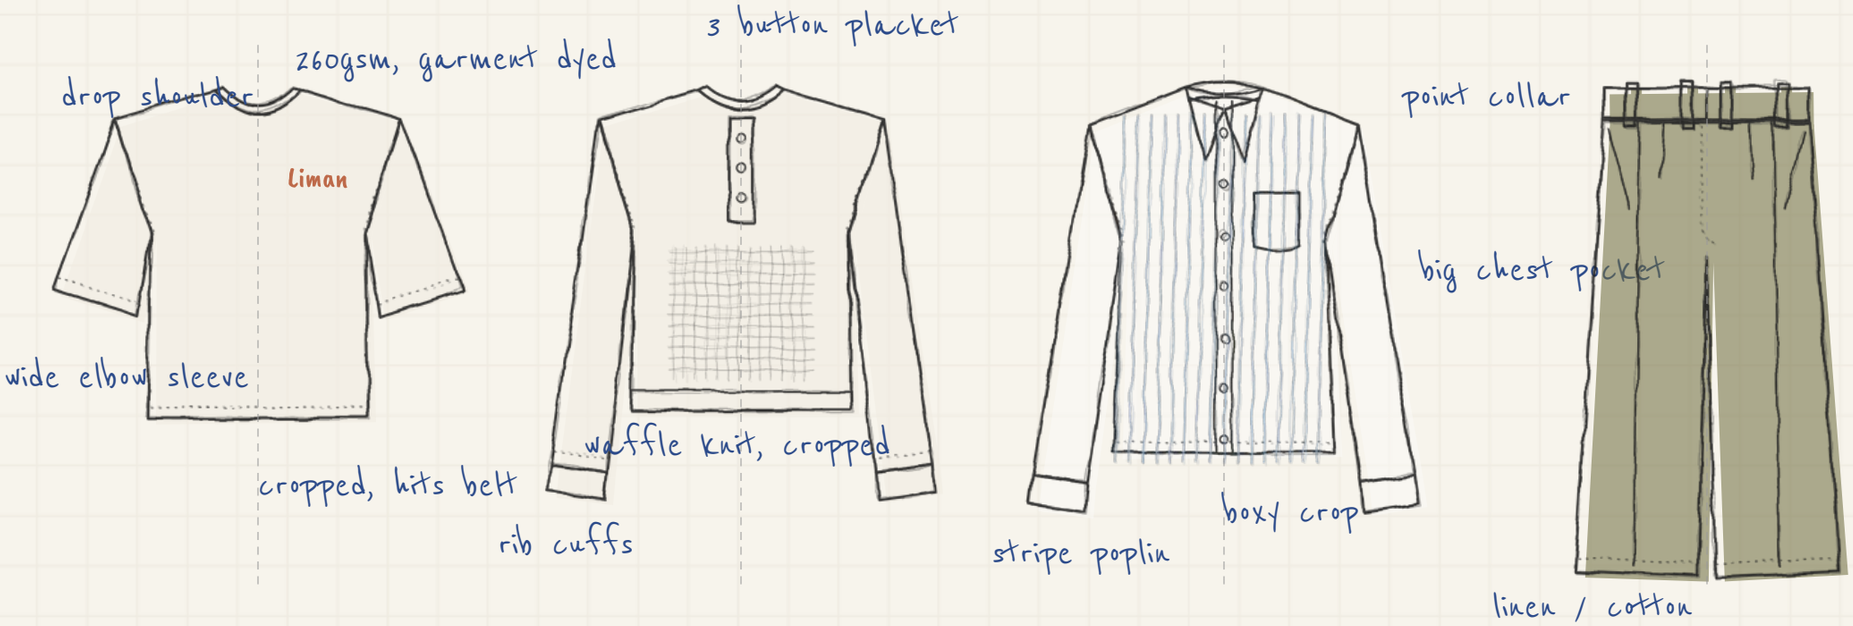

COLOUR TAKEN FROM THE İZMIR COAST

Limewash walls · sand · faded umbrellas · roof tiles · olive trees · the sea at night

First Summer, rough

everything from one cropped block →

Marker and pencil style working sketches. Editable files supplied separately.

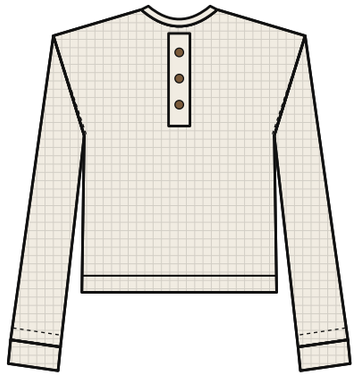

LIMAN · LINE-UP

First Summer drop

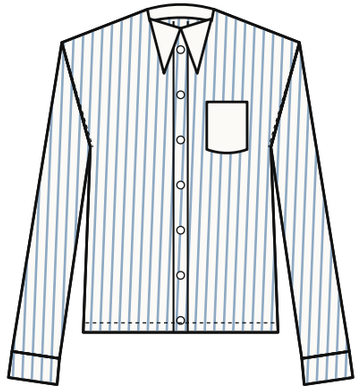

Liman

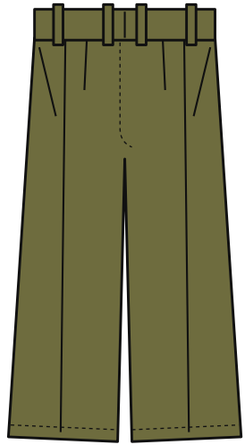

Boxy Crop Tee
260gsm jersey · garment dyed

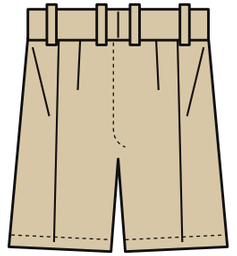

Waffle Henley
Cotton waffle · 3 button placket · cropped

Awning Stripe Shirt
Poplin · point collar · cropped

Double Pleat Trouser
Linen-cotton · wide leg

Pleated Short
Linen-cotton · 9in inseam

Liman

Liman · First Summer lookbook

AI-generated visualisations of my designs (Higgsfield)

LIMAN · LOOKBOOK

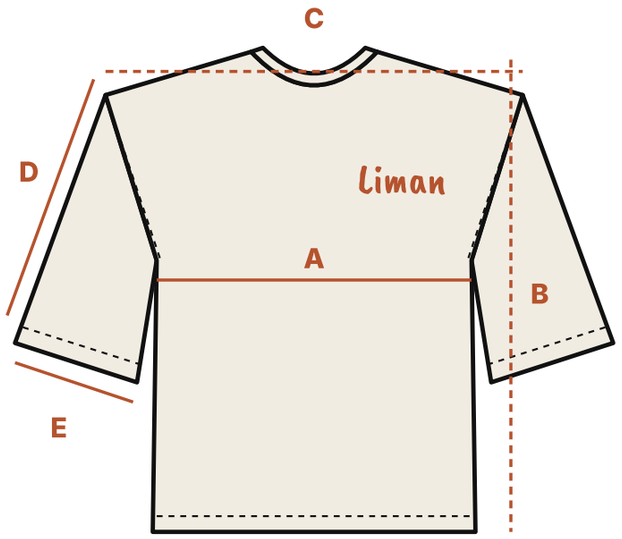

Oversized, not sloppy.

Big, square tops cropped at the belt and very wide pleated trousers. The proportion takes cues from SGO and Represent, the line art from Aimé Leon Dore, softened with Aegean colour and an olive tree drawn by hand on the back.

see you at the harbour

AI-generated visualisations (Higgsfield)

Boxy Crop Tee, spec

FRONT

BACK · HAND-DRAWN OLIVE TREE PRINT

	SIZE M, CM	STANDARD TEE	LIMAN
A	Chest width	52	**62**
B	Body length (HPS)	72	**64**
C	Shoulder width	46	**60**
D	Sleeve length	20	**24**
E	Sleeve opening	17	**22**

8cm shorter and 10cm wider than a standard tee, so it sits at the belt and drapes square.

COLOURWAYS

Limewash · Navy · Terracotta · Olive

Fabric: 260gsm cotton jersey, garment dyed for a sun-faded finish · 2.2cm neck rib · twin-needle hems · water-based back print

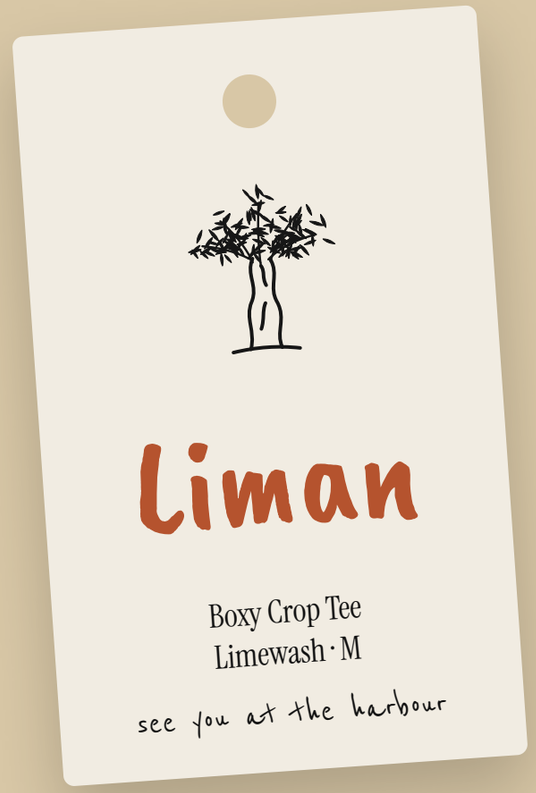

Labels, tags, packaging

Liman

Woven neck label

M · 100% cotton

Care / size tab

Swing tag

LIMAN

İZMİR · TÜRKİYE

made for long summers

Recycled mailer box with a single-colour print

PROJECT 04 · WEARABLE TECH

POSTURA

An Arduino-programmed wristband that learns the difference between good and poor posture from motion data, then vibrates to nudge you upright before the slouch becomes a habit.

Duration: 4 weeks

Year: 2024

Type: Wearable tech & product design

TOOLS

SolidWorks, KeyShot, Procreate, Arduino, Edge Impulse

Lifestyle image: AI-generated visualisation (Higgsfield)

It learns your slouch.

01

Collect

Motion data from the accelerometer, gyroscope and magnetometer, labelled good or bad posture.

02

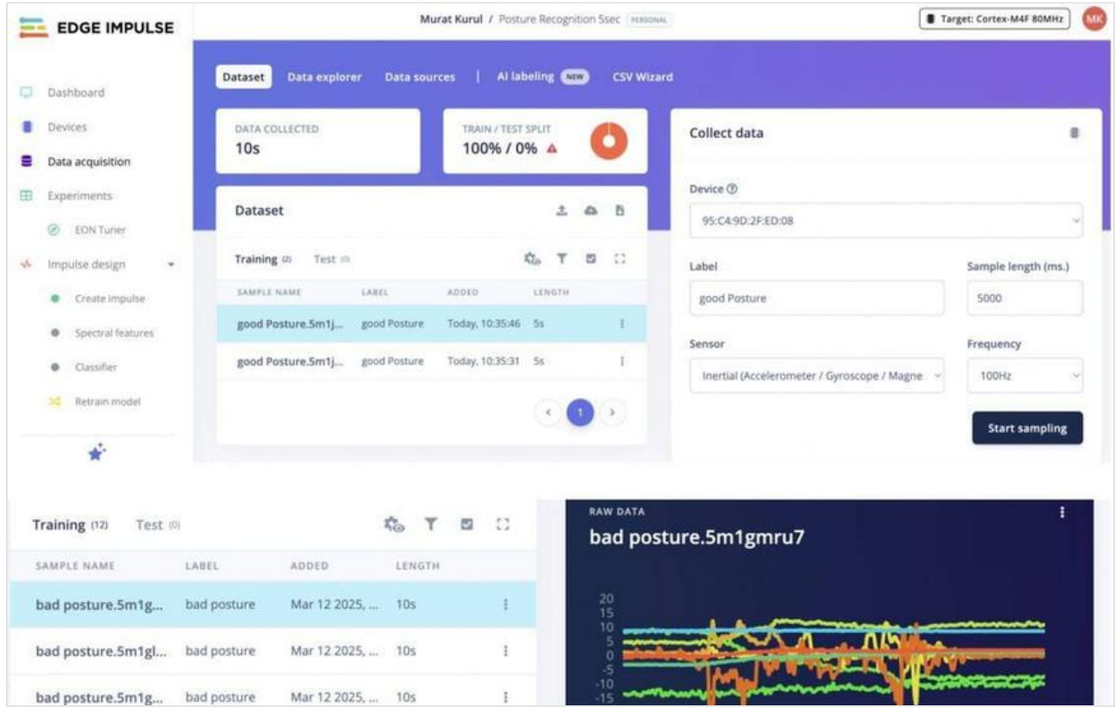

Train

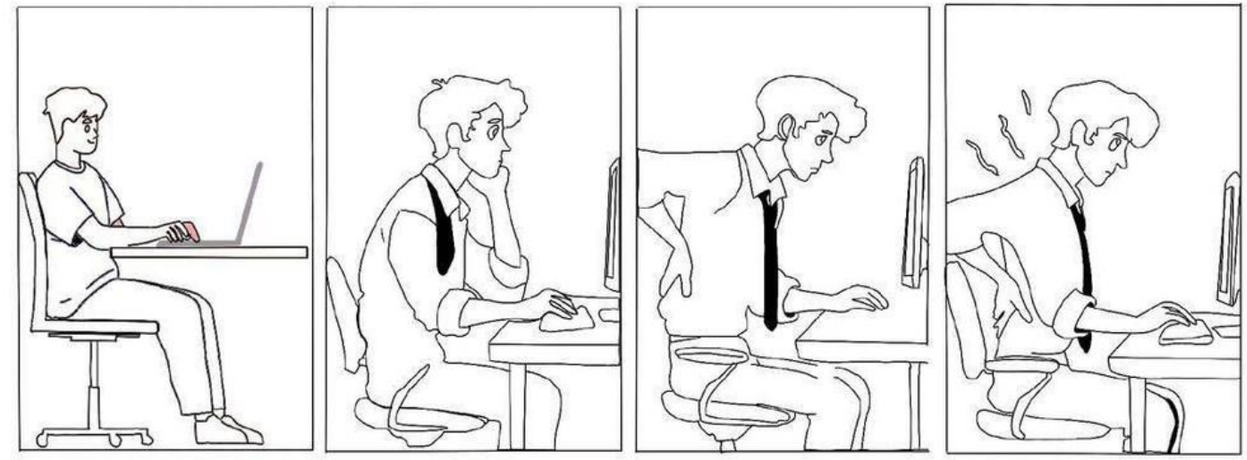

A classifier built in Edge Impulse and run on the Arduino itself.

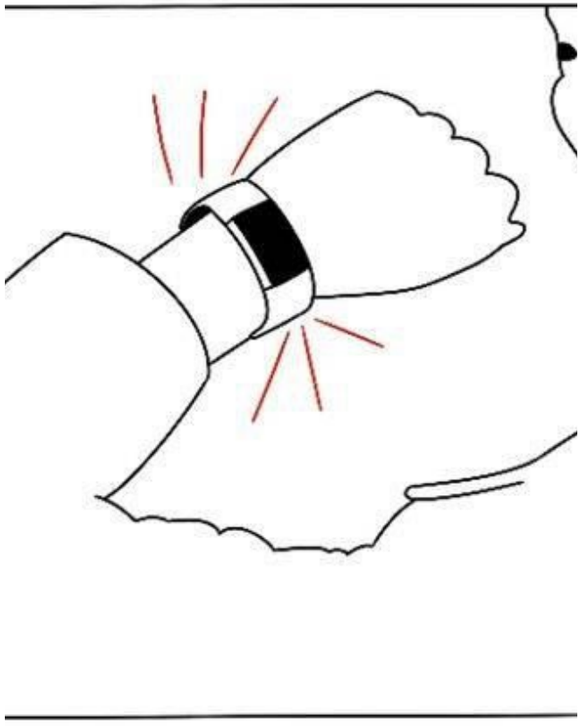

03

Nudge

When it detects a slouch, the band vibrates. No app needed.

Storyboard: the user slowly slouches, Postura buzzes, they sit back up. Photo: AI-generated visualisation (Higgsfield).

PROJECT 05 · SELF-INITIATED CONCEPT

ナイトコート

Night Court

A unisex streetball warm-up capsule for players who go from a late pickup game straight into the city. The silhouettes take their cue from shōnen anime school uniforms: a tall stand collar, a bright hood layered underneath, and ink-dark fabric that flashes violet and teal under the floodlights. Hero confidence, cut as real sportswear.

Type: Apparel concept
Status: In development
Year: 2026

HERO: HIGH-COLLAR WARM-UP JACKET

Tall stand collar
Rises to the chin, closed with two brass snaps

Layered hood
Signal-red jersey hood that sits inside the collar

Rib cuffs
Red, so the hood colour repeats at the wrist

Iridescent tape
Violet-to-teal reflective seam tape catches court lights

Concealed zip
Clean front under a storm flap

Boxy, hip length
Room to shoot in, sharp on the street

AI-generated visualisation of my concept (Higgsfield), not a produced sample.

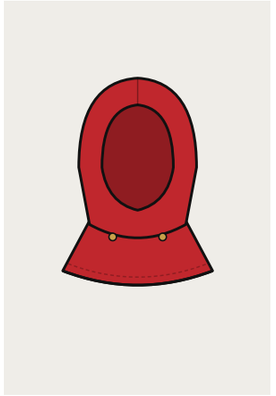

NIGHT COURT · LINE-UP

Five pieces, one story.

Every piece keeps a basketball base (tricot, mesh, ribbing) and borrows one anime-uniform detail that also does a job: a collar that keeps the cold out, a hood that layers, stirrups that keep the pant clean over court shoes.

High-Collar Jacket
Tricot · brass snaps · seam tape

Hood Layer
Jersey · snaps into the collar

Funnel Shooting Shirt
Heavy jersey · rib mock neck

Stirrup Track Pant
Tricot · footless stirrups

Court Short
Mesh · red rib waist

Ink
Base, night

Signal Red
Hood, cuffs

Flash
Reflective tape

Bone
Light layer

Brass
Snaps only

ANATUDE

A modular clothing system that keeps climbers warm, mobile and comfortable as conditions change at altitude. Inspired by the **Annapurna range** and the **Himalayan Monal**, its layers and vents let the wearer adjust protection through the climb.

DESIGN FOCUS

· Layering system: shell, mid layer, base
· Zip-off and vented panels for temperature control
· Colour story pulled from the bird's plumage
· Line-up sketches and detail call-outs

Project 06

Type: Apparel system · group project (team of up to 4)

ANATUDE · MOODBOARD TO PRODUCT

From a bird to a system

I built the moodboard around the Monal's iridescent colour shifts and the textures of snow and rock, then translated them into gradient prints and blocked panels. Technical outdoor references set the function; the bird set the attitude.

What I'd push next

Technical flats for each layer, a fabric and trim list, and a toned-down colourway for a wider, more commercial customer.

Palette taken from the Himalayan Monal

PROJECT 07 · DISSERTATION

What players wear changes how they play.

I asked how the look and feel of basketball footwear affects players' perceived confidence, identity and performance. As a BUCS player myself, I could talk to athletes as a teammate, not an outsider.

8

BUCS players

University-level basketball players interviewed

1:1

Semi-structured

Open conversations around set themes

TA

Thematic analysis

Coding transcripts into recurring themes

HOW THIS SHAPES MY DESIGN WORK

- → Start with the athlete's own words, then design. Not the other way round.
- → Aesthetics are functional: how a product looks affects how confident someone feels in it.
- → Identity matters as much as performance, which is exactly why Night Court leads with culture.

PROJECT 08 · INDUSTRY

Contex Textile

Product Design Development Intern

Istanbul · Jun 2025 – Jun 2026

A year in-house at a garment manufacturer and its London sister company, Conuk Ltd. I saw how a product really gets made: the back-and-forth with suppliers, sample rounds, specs and the presentation that wins the order.

The ranges I worked on are confidential, so no product images are shown.

THE PROCESS I SUPPORTED

01 Brief
Range direction from the customer

02 Sourcing
Working with suppliers on fabric and trims

03 Sampling
Following samples between factory and team

04 Specs
Supporting specifications for production

05 Presentation
Brand materials for buyer meetings

What it taught me

Creative intent always meets cost, lead time and factory capability. Raising issues early saves a sample round.

Also delivered

The new Conuk Ltd website, designed in Figma and now live at conukltd.co.uk (page 28), plus one visual identity across both companies' buyer materials.

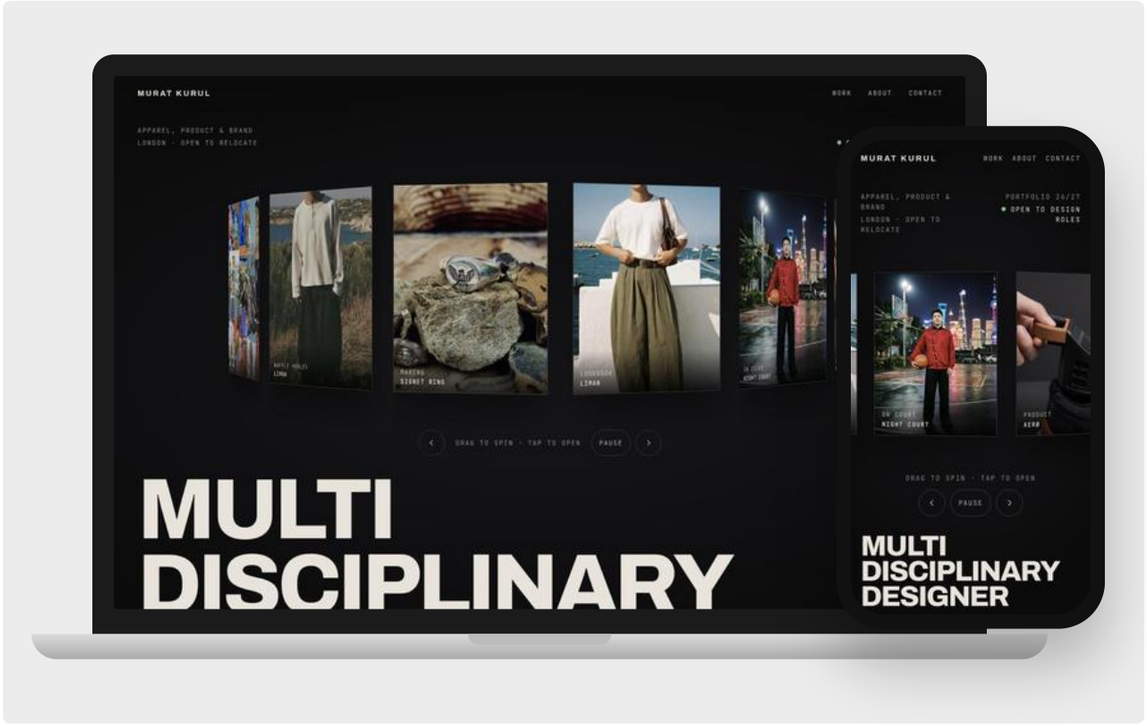

WHAT I'D BRING TO A DESIGN TEAM

SUPPLIER & FACTORY COMMUNICATION · SPEC ACCURACY · SAMPLE REVIEW · COST VS. CREATIVE TRADE-OFFS · CLIENT-READY PRESENTATION · RAISING RISKS EARLY

PROJECT 09 · DIGITAL

Two live websites.

Both designed by me and live today, one for my own work and one for a real client. Same thinking as a product: who is it for, what do they need first, and how does it feel on a phone.

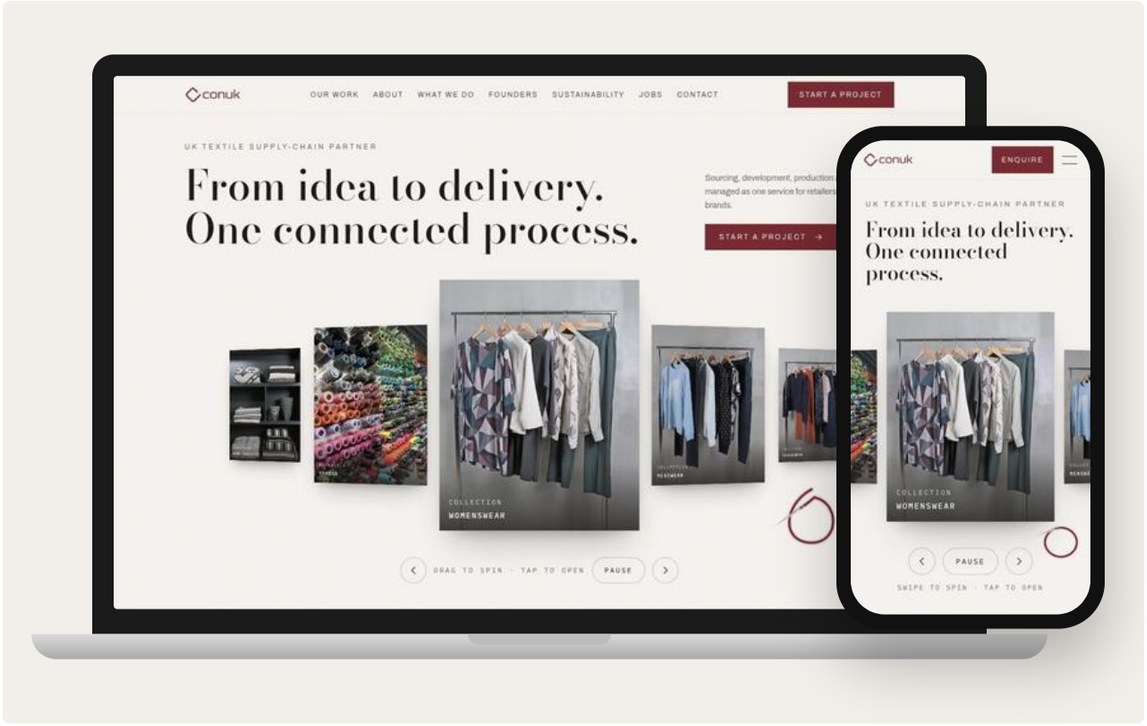

muratkurul.com

PERSONAL PORTFOLIO

A dark, image-led portfolio built around a 3D project carousel you can drag and spin, with a case-study page for each project and a layout that holds up on mobile.

UX & LAYOUT · ART DIRECTION · RESPONSIVE

conukltd.co.uk

CLIENT · CONUK LTD, LONDON

A redesign for a textile supply-chain partner. One clear story, "from idea to delivery", for UK retailers and fashion brands, with an enquiry form that goes straight to the founders.

FIGMA · BRAND & TONE · ENQUIRY FLOW

Range of making

Family signet ring

Researched my parents' places of origin and turned that heritage into the symbol on a hand-made silver ring. Culture as a starting point, the same way Liman and Night Court started.

Product & furniture

Rhino form studies, a rapid-prototyping project and furniture pieces, from concept to physical outcome.

Thank you.

I'd love to bring this way of working to your team.
